

TITLE: Toxicology Intern
REPORTS TO: Director of Toxicology
CLASSIFICATION: Part-Time
SUPERVISES: NOT APPLICABLE

POSITION SUMMARY

The primary responsibility of the Intern is to support the staff scientists in their toxicology and risk assessment work. The Intern will perform routine human health and environmental risk assessments under supervision and more complex assignments as part of project teams. The position will also include some administrative, marketing, and general office support tasks. With experience, the Intern will be able to independently evaluate appropriate scientific methodology and apply that methodology to scientific questions.

ESSENTIAL JOB RESPONSIBILITIES

- Technical writing.
- Performs literature reviews of scientific literature and conducts general scientific research.
- Prepares product exemplars to be tested at laboratories.
- Analyzes data from laboratory testing.
- Conducts and documents QA/QC activities for work assignments.
- Performs administrative tasks and other projects as requested.
- Maintains confidentiality of client information and project work.
- Reports timely and accurately to the project manager on assigned projects.
- Conducts all activities within the identified scope, schedule, and budget for each assignment.

REQUIREMENTS

- Bachelor's degree or currently enrolled in a 4 year degree program in toxicology, risk assessment, human biology, public health or related life science discipline.
- Skills in data analysis, including MS Excel with more advanced skills in statistics and data analysis preferred.
- Excellent oral and written communication skills.
- Demonstrated experience working and communicating successfully in a team environment as well as ability to work independently toward predetermined goals and objectives.
- Strong work ethic and an interest in learning.

ABOUT INTERTOXX, INC.

Since 1995, Intertox, Inc. has been a leader in assessing the risks posed to public health and the environment by chemical and biological agents. With an emphasis in four key areas— scientific research, data analysis, communications, and strategic counsel —Intertox addresses public health concerns and environmental issues based on science and grounded in independent, rigorous analysis. We have served government entities, private and publicly held companies, legal communities, and non-profit organizations.

Intertox professionals possess a wide range of training and experience across numerous disciplines, including toxicology, chemistry, environmental science, risk assessment, exposure modeling, science communication, regulatory affairs, and research.
